Professional Experience

6/98 – Present Speech-Language Pathologist - Owner of private speech pathology practice
Deborah Bastidas & Associates; Speech Pathology Consultants
5909 West Loop South, Suite 270, Bellaire, TX 77401

Population: Pediatric (infants and children) and adult patients with velopharyngeal, voice, fluency, neurogenic and oromotor deficits related to disorders of speech, language, and swallowing

Responsibilities:

- Evaluation and treatment of patients, and consultation with patients and families re: normal versus impaired oromotor function, based upon the individual's specific deficit areas
- Administrative duties related to ownership of private practice
- Continued research and dissemination of established and new information re: all aspects of management of these disorders to families and part-time speech pathologists who see patients at this office
- Development and re-organization of protocols for evaluation, treatment, and consultation, based upon current reported research
- Use of neuromuscular electrical stimulation (VitalStim) as a treatment modality for dysphagia
- Contract work with Personal Physician Group: including evaluation and treatment of adult patients with speech and swallowing deficits (Houston, TX)

3/96 – 6/98 Speech-Language Pathologist - Director of Speech Pathology
Vosswood Center: Life Care Centers of America
 815 South Voss Road, Houston, TX 77057

Population: Geriatric long-term care residents with disorders of speech, language, and swallowing; outpatients which include the elderly, as well as infants and children with similar disorders.

Responsibilities:

- Evaluation and treatment of patients, per physician order, utilizing a variety of therapeutic techniques
- Administration and interpretation of videofluoroscopic and fiberoendoscopic evaluations of swallowing and speech, per physician order
- Screening of new admits, rescreening quarterly or as needed
- Communication with families, physicians, and other health team members regarding residents, and documentation in medical records, labor and service logs
- Participation in rehabilitation team meetings and appropriate committees; as Director of Speech Pathology: all administrative duties related to directorship of full-time and per diem speech pathologists
- Plus extensive research and dissemination of established and new information re: all aspects of management of this population
- Development of programs and protocols for all radiographic and clinical evaluations, treatment and screening procedures
- Marketing of both the inpatient and outpatient programs within the medical community

5/95 – 3/96 Speech-Language Pathologist
Orthopedic & Neurological Rehabilitation, Inc.
 770 S. Post Oak Lane, Suite 400, Houston, TX 77056

Population: Geriatric long-term care residents with disorders of speech, language, and swallowing.

Responsibilities:

- Evaluation and treatment of patients, per physician order utilizing a variety of therapeutic techniques
- Screening of all new admits, rescreening of all patients quarterly or as needed
- Communication with families, physicians, and other health team members regarding residents; and documentation in medical records, labor and service logs
- Participation in rehabilitation team meetings and appropriate committees

8/89 – 5/95 Speech-Language Pathologist
Texas Children's Hospital
Department of Speech, Language, and Learning Disorders
 6621 Fannin, Suite 400 CCC; Houston, TX 77030

Population: Infants and children with disorders of speech, language, and swallowing related to structural anomalies and/or neurogenic deficits, including: cleft lip and/or palate; a variety of craniofacial anomalies and/or syndromes; head injury; brain tumor; and neurogenic impairments of unspecified origins.

Responsibilities:

- Evaluation and management of inpatient and outpatient infants and children including: videofluoroscopic assessment of swallowing and velopharyngeal function during speech
- Participation in weekly Baylor College of Medicine and Texas Children's Hospital Cleft Palate Clinic and monthly Baylor College of Medicine and Texas Children's Hospital Craniofacial Anomalies Clinic for evaluation and consultation purposes
- Consultation with families of infants and children with speech and swallowing disorders, regarding pertinent information and recommendations in-services for, and frequent contact with, speech pathologists in the community to provide new findings and/or techniques for the evaluation and management of velopharyngeal insufficiency, etc.
- Continuous follow-up of all patients to ensure appropriate management; at least weekly rounds/conferences with physicians to review findings, recommendations, etc.

8/85 – 8/89 Speech-Language Pathologist
University of Texas Health Science Center/Speech & Hearing Institute
 1343 Moursund, Houston, TX 77030

Population: Children and adults with disorders of: language, articulation and voice (including: dysarthria, apraxia, and aphasia), swallowing, fluency and hearing; primarily pediatric (and some adult) patients with head injuries or stroke at The Institute for Rehabilitation and Research (TIRR).

Responsibilities:

- Individual assessment
- Individual/group treatment
- Participation in pediatric team functions, e.g. weekly multidisciplinary (physicians, nurses, occupational and physical therapists, teachers, social workers, and neuropsychologists)
- Chart rounds regarding patients' progress at TIRR
- Close interface with all team members in daily treatment of individual patients, decisions/recommendations regarding educational placement and/or further treatment of discharged patients

8/79 – 8/85 Speech-Language Pathologist
Houston Independent School District
 Houston, Texas

Population: English and Spanish-speaking students, grades K-12, in regular and/or Special Education.

Responsibilities:

- Individual evaluation (English and Spanish)
- Individual or group management for disorders of: fluency, voice, articulation, language and hearing
- In-services for faculty members
- Membership on Referral and ARD committees
- Informing parents and teachers of students' progress
